Why your gift matters...

2016 Annual Report

— in Brief —

YOUR GIFT RESTORED 10,000+ ACRES OF RIVER WETLANDS AND WILDLIFE HABITAT

PRH and partners have succeeded in holding the highly destructive New Madrid levee project at bay. The project would destroy vital fish and bird habitat on the Mississippi River and put southern IL towns at great risk of destructive flooding.

YOUR GIFT INTRODUCED 1,500 REINOIS FARM OWNERS TO SUSTAINABLE AGRICULTURE PRACTICES

With a coalition of partners, we are advancing the adoption of farm practices such as cover crops, diverse crop rotations, and edge of field buffers and wetlands. These strategies preserve soil health on farms while also preventing water quality

YOUR GIFT ADVANCED MONARCH AND POLLINATOR HABITAT DISTRIBUTION IN ILLINOIS

Deep-rooted Milkweed and native flowering plants help us soak up more water, sediment, and nutrients from stormwater and agriculture runoff, keeping them pollutants that harm fish and cause toxic algae blooms out of our rivers and drinking water.

YOUR GIFT PROTECTING ILLINOIS' ONLY WILD AND SCENIC RIVER—THE MIDDLE FORK GRAYBOW

Working together, we achieved stronger federal coal ash rules. We will continue to keep pressing for stronger state rules and calling for Dynegy to remove coal ash impoundments from the floodplain of the Middle Fork of the Vermilion River.
