## "Using On-line Data and Tools for Your Watershed"

## A Watershed Capacity Building Workshop hosted by Prairie Rivers Network and the Illinois Lake Management Association

**Topics and Presenters:** In northern Illinois (Chicago), two groups participated in the workshop – those interested in technical skill-building, and those interested in outreach topics. In central Illinois (Champaign), there was only interest in the technical content, although a shortened outreach section was presented over the lunch break.

At both the northern (Chicago) and central (Champaign) workshops, U.S. EPA presented the technical modules of this workshop. Save the Dunes, from Indiana, also spoke at both locations. PRN presented an outreach module in Chicago only.

The same topics were covered in the morning session for all attendees of both tracks in Chicago, as well as in Champaign:

- finding on-line data you can use for watershed planning (e.g. EPA's My Environment, Enviromapper for Water, STORET)
- compiling on-line data into useful sets of information
- using the data you have collected to prioritize projects, needs and goals

The afternoon topics for the Chicago technical track and Champaign were:

- using Data2Maps (D2M) to display monitoring data for assessment and analysis purposes
- creating informative maps/resources for your watershed group
- creating a customized water quality monitoring template for your area by inputting monitoring data and images
- using data to calculate monitoring needs

The Chicago outreach track and a lunch-time presentation in Champaign covered:

- finding available resources in U.S. EPA's Non-Point Source (NPS) outreach tool box
- using the NPS toolbox to customize public service announcements for outreach and education

Additionally, the Chicago outreach track covered:

- using data to create websites and presentations which convey the problems in your watershed
- using data to provide others with meaningful action steps they can take in your watershed

**Attendance:** Thirty people total learned about on-line data and tools, 12 in northern Illinois and 18 in central Illinois. Participants represented a variety of organization types, with a slight majority working for the government (see charts below).

"Using On-line Data and Tools for Your Watershed – Chicago" June 22, 2009			
Organization Type Represented	Technical Track	Outreach Track	Number of Evaluations Received
Local Lake Association & Consultant	_	1	1
Local Lake Association, Watershed Group, & Environmental Organization	_	1	1
Local Watershed Group & Government	-	1	1
Environmental Organization	1	1	2
Government	2	1	3
Consultant	3	1	4
TOTAL	6 attended	6 attended	12 evaluations

"Using On-line Data and Tools for Your Watershed – Champaign" August 7, 2009			
Organization Type Represented	Outreach Track (only)	Number of Evaluations Received	
Local Lake Association	2	2	
Local Watershed Group & Academia	1	1	
Environmental Organization	4	3	
Environmental Org. & Academia	1	1	
Environmental Org. & Government	1	1	
Government	6	6	
Consultant	2	2	
Academia	1	1	
TOTAL	18 attended	17 evaluations	

**Outcomes:** At both locations, the majority of people found the workshop extremely helpful or very helpful. People were pleased with the workshop binder that was provided, the one-on-one interaction with U.S. EPA staff, and the hands-on approach at their own computers. Detailed feedback is in the following charts.

Participant Rating of Presentat	ions – Chica	go:		
Topic and Presenter: (not all participants ranked each topic)	Extremely Helpful	Very Helpful	Somewhat Helpful	Not So Helpful
"Getting the Data and Tools On-line" Lucy Stanfield, Carmen Masó, Cyd Curtis	8	3	1	-
"Putting the Pieces Together" Jennifer Nebe, Tom Davenport	3	7	1	1
Technical Track: Cyd Curtis, Janice Huang	3	2	-	-
Outreach Track: Tom Davenport, Kim Erndt, Jennifer Nebe	3	3	-	-
Wrap-Up Session	1	1	_	-

## Participant Feedback – Chicago:

Local Lake Association &	"Very. The on-line resources are amazing. The only issue is how few people know
Consultant	about it."
Lake Assoc., Watershed	"To continue the planning and implementation process in local watershed
Group, Environmental Org.	planning."
Local Watershed Group &	"Yes, very much so. I think we now are more familiar with using the data to make i
Government	more accessible and understandable to the general public."
Environmental Organization	"Extremely useful information. Thank you."
	"Identifying impaired waters."
Government	"Yes – the outreach track will be useful to educate our residents."
	"Yes - this could add another useful layer of information when reporting current
	conditions."
	"This is my first session on watershed work so it was very useful because I learned
	where data is located."
Consultant	"Yes, very helpful. However I think someone with less familiarity might be easily
	overwhelmed."
	"Very much so. It will make it easier to quantify our baseline data."
	"Yes. It will help in obtaining and working through the data."
	"Yes. Very nice to have condensed references and help."

what did you like about this	workanop:
Local Lake Association &	"The information presented and the size of the group."
Consultant	
Lake Assoc., Watershed	"Hands-on activities – handouts were excellent."
Group, Environmental Org.	
Local Watershed Group &	"The speakers were excellent and made following along very easy and
Government	understandable."
Environmental Organization	"The hands-on process. Handouts on excellent paper."
	"Google Earth portions."
Government	"Hands on!"
	"Very organized."
	"The step-by-step instructional guide and the person walking about adding extra
	assistance."
Consultant	"The introduction to resources."
	"Learning about the ways to use Excel to help quantify data and give a visual reputation."
	"Learning how to obtain the information. The D2M workbook is awesome – it
	should help a lot. The binder is a great resource."
	"Interactive components. Being able to actually click and explore helps process the
	information."
What else would you like to	learn about using on-line tools and data?
Legal Lake Appaciation 9	"Albert courses of information (ICNAZ & ICNAL files) can be found "

Local Lake Association &	"Where sources of information (KMZ & KML files) can be found."
Consultant	
Lake Assoc., Watershed	(no comments)
Group, Environmental Org.	
Local Watershed Group &	(no comments)
Government	
Environmental Organization	"More!"

	"not sure"
Government	"When and how I would need the data and tools. I would also like a session that
	used this data in the bound of GIS."
Consultant	"It would be helpful to work through the process and an actual report to understand
	the goal of the tools."
	How to implement data groups larger than 16"
	"Explanation on how we should reach out to everyone on importance of global
	watershed approach. It would have been nice to see municipalities attending to
	have them pull together and put watershed plans together."
Do you have ideas for future	workshop topics? Other comments?
Local Lake Association &	(no comments)
Consultant	
Lake Assoc., Watershed	"Thanks for the effort necessary to make these sessions a success."
Group, Environmental Org.	
Local Watershed Group &	"Possibly how to keep watershed groups focused and produce results, not just a
Government	plan; i.e. improved water quality pollutant loads."
Environmental Organization	"International environmental work – sharing of knowledge."
	"no"
Government	"GIS watershed usage."
Consultant	"Introduction to watershed management; mitigation planning."
	"Field methods and other sampling protocols."
	"More discussion on available funding to develop a watershed plan."

Local Lake Association	Participant Feedback – ( r watershed work? If so, how will "Yes, we are trying to build a data "Yes, we are collecting data curre with it."	you apply it? base." ntly and this is	the perfect		
Local Watershed Group & Academia	"We have needed to find a way (or pictures, thanks!) to convert our d current webpage."	•			
Environmental Organization	"To create maps and understand "I comment on projects that impact information to help me learn more project areas, as well as learning to project sites."	ct wetlands and about particul	d streams, s ar wetlands	so I plan to use and streams th	nat are in

Environmental Org. &	"I learned of many new resources that I can add to our website. I also have a better
Academia	idea of the type of information that is in demand."
Environmental Org. &	"Yes. I had seen some of these sites, but never taken time with them. It's great to
Government	have versed people showing one how to navigate them and show examples. I have
	been wanting to add more detailed data about impaired streams to reports that I do
	for developers and county planners. We are pretty rural and many people will
	appreciate data in this form at (pretty maps)."
Government	"I wish I had this training earlier. The ability to access data and maps from internet
	resources and sites. Just knowing where to go saves so much time and
	frustration."
	"Yes. I will apply the material to management plans for a county forest preserve."
	"Yes. I will use it to bolster my own data with additional on-line sources. I will also
	use ideas on how to present the data in a meaningful way."
	"Yes! In reviewing development proposals, the ability to match physical data
	(population, water quality) with the development gives us the facts and rationales for
	steering development to specific locations as well as types of compatible
	development for a given site."
	"Yes – I turned in an EPA 319 grant last week. If I had this training earlier, may
	application would have been <u>much</u> better. I will use the info. to improve and target
	my 319 grant if we are approved."
	"Yes – for preparation of maps, and where and how to find other sources."
Consultant	"Yes."
	"I intend to use the mapping and data calculations/collection to benefit clients who
	could benefit from grant acquisition/funding to improve their watersheds and water
	ourselies "
	supplies."
	"This will be used to generate maps for presentations."

	"Hands on approach; lots of information, but detailed handouts to take home so the info. is retained."
Academia	"The follow along binder!!"
What else would you like to	learn about using on-line tools and data?
Local Lake Association	"Probably do this again to refresh my memory or get new ideas."
Local Watershed Group &	"When I get caught up with all this information, there may be more information I'll
Academia	need."
Environmental Organization	(no comments)
Environmental Org. &	"Your focus for this session was mainly oriented towards maps – creating maps.
Academia	What about other on-line resources? Finding data, summaries, publications, reports?"
Environmental Org. & Government	"This is plenty for now, so I'm having trouble thinking of something new."
Government	"Let me let all this sink in first, then we'll see."
	"I just need to explore everything that was skipped today."
	"Not enough knowledge yet."
	"This was good general info., but I am sure a lot could be learned about how to use
	the info. for making and implementing the plan."
	"Grants available to watersheds."
Consultant	(no comments)
Academia	"Getting the 'hard' numbers from the different map layers."
Local Lake Association	<ul> <li>workshop topics? Other comments?</li> <li>"Do not schedule workshops for Friday."</li> <li>"This was very well worth our time. Well-organized!"</li> </ul>
Local Watershed Group &	(no comments)
Academia	
Environmental Organization	"I can't remember if this was intentional, but at one point we had a longer break (or
Entrioninional organization	longer lunch) that provided the opportunity for folks to choose to stay in the lab and
Environmental Org. &	- so I was able to do a little at my own pace while there were still people around to help me with questions."
_	<ul> <li>– so I was able to do a little at my own pace while there were still people around to help me with questions."</li> <li>"It felt too fast and too cursory. How does one use STORET, for instance? What is the scope of the available data? TMI! Need in-depth help with a few databases."</li> </ul>
Environmental Org. & Academia Environmental Org. & Gov't	<ul> <li>– so I was able to do a little at my own pace while there were still people around to help me with questions."</li> <li>"It felt too fast and too cursory. How does one use STORET, for instance? What is the scope of the available data? TMI! Need in-depth help with a few databases."</li> <li>"This was great and everyone was very friendly. I learned a lot! Thanks! Parkland</li> </ul>
