

Mahomet Aquifer Sole Source Designation Hearing

TALKING POINTS FOR PUBLIC COMMENTS

- Clearly state your support for the designation of the Mahomet Aquifer as a sole source aquifer.
- Your drinking water comes from the Mahomet Aquifer and it is your preferred water supply because it is cleaner than nearby surface waters (which are polluted by agricultural and urban runoff).
- You believe that the time required for U.S. EPA review of federally-funded projects over the aquifer is worth it because it will better ensure the aquifer is protected from polluting projects (reviews typically take less than two weeks).
- You believe that federally funded projects must be socially and environmentally responsible, so U.S. EPA reviews are very appropriate and will provide you with more peace of mind.
- If you own a business that relies on clean and cheap drinking water, please state such.
- Thank U.S. EPA for proposing to approve the designation.
