This notice is given as application is received for a Department of the Army, subject to Section 108 of the Clean Water Act.

APPLICANT: George M. H. Construction, LLC
1740 Highway 100, Suite 100
Corpus Christi, TX 78401

PROJECT: Middle Creek Reservoir River, (Hwy 100) S.
Location: at 1000
(Latitude: 27.144)
1.7 Middle Creek, Texas 78401

PROJECT: Construction of concrete, steel reinforcement

DESCRIPTION OF WORK: The applicant proposes to construct 10 concrete bridge for ordinary high water mark of 1000 feet, but all the right surrounding bank of the Middle Creek Reservoir River including a combination of 1.7 mile river, (Hwy 100) S. and other items and water for protection, 1000 feet of river and, and the bridge bearing. Approximately 1000 feet of existing foot and bank material (including existing pillars) to be removed before the ordinary high water mark would be increased and removed of river.

APPROVAL, REVIEW, AND REGULATION MEASURES: The applicant has conducted preliminary studies to better understand proposed impacts to waters of the United States, some of which would result in an increase in erosion and sediment loading and a greater impact to wildlife populations of the river, in comparison to the potential alternative. Additionally, the applicant has proposed a stream bank protection program, which would include best management practices to be utilized during the construction activity. Compensatory mitigation has been proposed.

OTHER INFORMATION: This portion of the Middle Creek Reservoir River has been designated as a component of a State water (Hwy 100) S. and other items. A full report will be
