

We have some very exciting news to share with you. In honor of our 50th Anniversary, our Board of Directors has pledged to make every donation awarded in December, up to \$10,000.

With your donation, you can unlock an additional \$10,000 to help protect the future of Illinois.

Our network is growing every day because of people like you, who understand the dangers of climate change, and identify our water and natural systems. Our members want to do everything they can to protect not only access to their water, and natural areas that are vital to human health and places of great scientific importance.

There are a handful of people in Illinois, who are asking you to please make a donation today because within one of week is due in 2023.

We have made great progress the past few years to make Illinois leaders in meeting the climate change while leading through the Climate Solutions Jobs Act (CSJA).

But our work is never done. We are up against big polluting industries with deep pockets and an overwhelming willingness to pollute our lives, destroy wildlife habitat, degrade the land, and stop that climate change from becoming a crisis.

To make matters worse, our federal laws like the Clean Water Act are being attacked in the Supreme Court level. That is why it is more important to act at the local and state level.

With your help, PFW is fighting back against the assault on the environment. (We're also after tonight to stop the Building Coal Windfall Permitted the Lake Park River in the million County. We need our laws to fight for our lives because if we don't, who will?

We have additional goals for 2023, but we cannot achieve them without your support.

Thank you,

President of Public Water Network
