

Energy Transition Community Grant Program - 2025

The Energy Transition Community Grant Program was created by the Climate and Equitable Jobs Act (CEJA) ([Public Act 102-0662](#)) in 2021. CEJA states that, “as part of putting Illinois on a path to 100% renewable energy, the State of Illinois should ensure a just transition to that goal, providing support for the transition of Illinois’ communities and workers impacted by closures or reduced use of fossil fuel power plants, nuclear power plants, or coal mines.”

Grant Program Overview

The Program provides grants to promote economic development to communities that are in an area with a closure or reduced operation of a fossil fuel power plant, coal mine, or nuclear plant.

2025 Phase 1 Application Due: June 30th at 5pm

2025 Phase 2 Application Due: October 31st at 5pm

Eligible Grantees

Eligible grantees include local units of government, incl. counties, municipalities, school districts, and other taxing districts within 30 miles of a closed or closing coal, gas, or nuclear plant or coal mine. The plant/mine must have closed or significantly reduced operation within 6 years before the application or will be closed or significantly reduce operation within 6 years following the application.

To apply, grantees must have a “letter of support” from the city or village that “hosts” the plant/mine. If the plant/mine is in an unincorporated area, the county becomes the “host” and issues the letters of support.

Funding

The grant program is funded at \$40 million dollars per year. The funding for each eligible entity is determined by a funding formula based on lost tax revenue and lost jobs. All eligible entities receive at least \$50,000.
